PROFILE

I am a passionate and driven Computer Science student with a strong interest in Artificial Intelligence and modern web development. I have hands-on experience working with the MERN stack, Next.js, and Python, and I enjoy building scalable, real-world applications. My recent projects include a 2D multiplayer metaverse using React, Socket.IO, and WebRTC. I am always eager to learn new technologies, solve challenging problems, and contribute meaningfully to innovative teams and projects.

PROJECTS

👥 2D Multiplayer Metaverse

Built a real-time multiplayer metaverse using React, Socket.IO, and WebRTC. Includes custom avatars, map creation, collision detection, and live chat and videocall

💬 Full-Stack Chat App

Developed a secure chat application using Node.js, Express, MongoDB, and React. Features real-time messaging, authentication, and online user tracking.

🏏 Cricket Score Prediction using AI/ML

Created a machine learning model that predicts cricket match outcomes based on historical data using Python, Pandas, and scikit-learn.

🎮 3D Game Engine (C++)

Developed a 3D game engine in C++ using GLFW for window creation and GLAD for OpenGL loading. Implemented basic rendering of 3D models and basic operations like transformations, camera control, and user input handling.
